[PowerShell – Is Local Admins Group Member](#)

The screenshot shows the Group Policy Management Editor interface. On the left, the tree view is expanded to 'Security Settings' > 'Restricted Groups'. The main pane displays the configuration for the 'OLD0\Server_Admis' group. A table at the top shows the group name and its membership:

Group Name	Members	Member Of
OLD0\Server_Admis		Administrators

Below the table, the 'OLD0\Server_Admis Properties' dialog box is open, showing the 'Configure Membership for OLD0\Server_Admis...' tab. The 'Members of this group:' section contains the text '<This group should contain no members>' and an 'Add...' button. The 'This group is a member of:' section contains a list with 'Administrators' selected, indicated by a red dashed arrow pointing to the 'Add...' button. At the bottom of the dialog, there are 'OK', 'Cancel', and 'Apply' buttons, with a red dashed arrow pointing to the 'OK' button.
